## Seed Corn in County.

Seed corn situation in Adams county is found to be quite serious by Farm Bureau Agent Hoffman.

On account of the early freezing weather last fall and the high moisture content much of the corn was frozen to such an extent that it is not safe to use, unless tested.

A germination test of each of the 317 exhibits from 39 different counties at the State Show held in Harrisburg, in January, showed the following results:

No. of Exhibits	Pct. Germination
115 or about 1-3	100
62 or about 1-5	91-95
94 or about 3-10	71-90
46	Below 70

It is safe to assume these exhibits represented corn above the average of the State and yet, if such were the results, what may be expected from crib-corn so much of which is used for seed, untested?

The Farm Bureau is receiving many inquiries for sources of good tested seed corn and every farmer who has worthy seed to offer should report: the name of the variety and per cent. of germination test to the Farm Bureau Office, Gettysburg, at once.

Frozen corn can be detected by a close examination of the germ with a knife. A dark yellowish germ indicates frozen corn, while a white plump germ is a sign of good germination. After selecting out the corn in this way, it should be tested for germination to be doubly sure of getting good strong germs. Replanting corn is a costly process these days. No man wants to do it and no man can afford to do it.

The County Agent has located a few cribs of good corn and those growers who do not have good seed should get in touch with him at once. Any one wanting information on testing corn can secure full particulars by calling the Farm Bureau Office.

## Forest Fires in Adams County.

Forest fires that occurred in Adams county last year were due to the following causes: Railroads, 1; brush burning, 2; incendiary, 4; campers, 1; hunters and fishermen, 1; lumbering, 0; lightning, 0; and miscellaneous, 2. During the last five years forest fires of more than 1000 acres in extent burned over 6,208 acres in this county. The figures were compiled by the Pennsylvania Department of Forestry.

Gifford Pinchot, the State's new chief forester, issued the following statement on the seriousness of the forest fire situation in Pennsylvania: "Forest fires are important almost beyond calculation. They cost us more than \$10 each year for every man, woman and child in Pennsylvania—not in the trees that are burned down but in the lumber, fence posts, poles, ties and other forest products they prevent from being produced. The great damage from forest fires is what they keep our woodlands from producing for us. Help us to hold them down this year."

## Road Building Proposition.

County Commissioners R. H. Lupp, Wm. Linn and W. C. Snyder at their meeting this week have taken a most important step and at the primary election May 18 the proposition is put up to the people whether they want to bond the county for the building of good roads and rebuilding bridges. The amount fixed for such issue is \$750,000. If the people vote the loan, the State will spend an equal sum with the county in road building.

This action of the County Commissioners was taken at the request and urging of the Good Roads Associations recently formed in all parts of the county. These associations have formed one county association with D. C. Jacobs as President; Charles Smith, of McSherrystown, Vice President; M. E. Knouse, Secretary, and E. A. Seabrook, Treasurer. The Executive Committee have visited the Highway Department getting all possible information as to types of road recognized as State aid roads and cost of same. Resurfacing of old stone road or pike being about \$15,000 a mile, water bound macadam with top pressing of ugite and chips \$12,000 to \$15,000, penetration roads \$18,000 to \$24,000, and reinforced concrete about \$24,000 a mile. It is believed that the bond issue urged would permit of the building in four or five years of about 60 miles of roads of various type recognized by the State. A committee on location is going over the roads and will recommend the mile-age most advantageously to be built. The position taken is that the greater part of the money should be spent on lateral roads to the spokes of State highways running into Gettysburg, so to make good roads available to the greatest number of people and not to spend the money where there are now hard roads but to build hard roads in sections not having anything of the kind and so build up a complete system.

Fruit Buds Unhurt. Peaches, apples and other kindred fruits were not injured by the recent cold snap, the Pennsylvania Agricultural Department states, as the buds are only open slightly. The wind dried the buds and trees, which protected them, to a great extent. Twenty-five degrees was the lowest the mercury fell and this along with the dryness was absolutely safe for the fruit.

**SAVING G. O. P.'S FACE.**  
The Republican majority in the House in Congress by a vote of 242 to 150 last Friday passed a resolution that the war with Germany is no more and that Germany is to accept certain conditions of the rejected treaty. The Republicans in the House are trying by this step to "save the faces" of the G. O. P. U. S. Senators who killed the treaty. Constitutional lawyers declare the resolution is not the legal way to end the war, but the G. O. P. will blow cold on its Americanism on killing the treaty in the Senate and blow hot on its resolution in the House and so long as the voters are fooled the aim of the G. O. P. in this presidential year will have been accomplished.

## How Diphtheria is Contracted.

One often hears the expression, "My child caught a severe cold which developed into diphtheria," when the truth was that the cold had simply left the little one particularly susceptible to the wandering diphtheria germ. If your child has a cold when diphtheria is prevalent you should take him out of school and keep him off the street until fully recovered, as there is a hundred times more danger of his taking diphtheria when he has a cold. When Chamberlain's Cough Remedy is given it quickly cures the cold and lessens the danger of diphtheria or any other germ disease being contracted. People's Drug Store.

# Only 1671 Out of 170,000 Ministers Pay Income Tax

Ministers are exempt from the operation of the income tax law—not through any specific exemption in the law itself but because they do not earn enough money to come within the law's minimum requirement. Out of a total of 170,000 ministers in the United States, but 1,671 receive a big enough salary to be required to pay any income tax.

These incomes were not only pay from churches but included private earnings too. Hundreds of ministers have been forced to engage in some occupation outside of the ministry such as poultry raising, bartering, market gardening, etc., to earn enough to feed and clothe their families. These figures show vividly why the Interchurch

World Movement has included increased pay for ministers as one of the chief planks in its forward-looking, five-year program for the expansion of Protestantism throughout the world.

The average salary of the college trained preacher is \$937 according to established figures—several hundred dollars less than the average annual earnings of the uneducated worker in some of the leading industries of the country.

A worker in the rubber industry averages \$1,526.20 a year. The average for the boot and shoe worker is \$1,346; for the chemical worker \$1,326.40; for the silk worker, \$1,179.88; for the paper worker, \$1,164; and for the wool worker \$962.72.

### Shoes Wear Longer

# Just Where and How Is the Money to be Spent?

A businesslike Answer to a businesslike Question

THIRTY denominations cooperating in the Interchurch World Movement have budgeted their needs. No business could have done it more scientifically.

They have united to prevent the possibility of duplication or waste. At least a million dollars will be saved by the fact that thirty individual campaigns are joined in one united effort.

Each denomination has arranged its budget under six main heads:

1 FOR THE CHURCH'S WORK AT HOME. A score of items come under this head. Consider only one. Five and a half million people in the United States cannot even read and write the English language. Who is to carry forward this vast work of Americanization if the church does not?

2 FOR HOSPITALS AND HOMES. Every year thousands of men and women seriously ill are turned away from Church hospitals because of lack of room. The children's homes are compelled to turn away more children than they can receive.

3 FOR HIGHER EDUCATION. Of the 450,000 American students in institutions of higher grade, one-half are in institutions founded and supported by the Churches. Many of these institutions have had no great endowment campaigns, but their needs are just as pressing as the needs of larger schools, and you have only to read their list of alumni and alumnae to measure the value of their contribution to America.

4 FOR RELIGIOUS TRAINING. At least 12,000,000 children and young people under 25 years of age are entering American life without any religious training at all. Remembering the faith of our Washington and Lincoln, do you think that America will continue to produce Washingtons and Lincolns if faith dies out of the hearts of its youth?

5 FOR THE CHURCH'S WORK ABROAD. Influenza came first from the Orient thirty years ago; nearly all plagues are Oriental plagues. So long as China has only one physician to every 40,000 people the Orient will continue to be a menace. So long as one-third of the babies of India die before their second year, our own babies are not safe. A Christian doctor or teacher sent abroad is working for America as truly as though he worked at home.

6 PREACHERS' SALARIES. The preacher is called the "forgotten man," and well he may be. Eight out of ten preachers are paid less than \$20 a week!

Each denomination has its own detailed budget, and will administer its own funds. Your pastor has copies of the budget; examine them for yourself. In the week of April 25th-May 2nd you will be given your opportunity to help. You can do it with the full satisfaction of knowing that every dollar of your gift has its post assigned to it in advance.

Every dollar for better America and a better world. When your church calls on you give—and give with your heart as well as your pocket-book.

## Don't Treat Kidneys Rough, Warns Dr. Carey, Specialist

Constant Flushing May Injure the Delicate Organism and Seldom Removes the Poisonous Deposits.

Now that Dr. Carey, kidney and bladder specialist, has retired from active practice, he generously warns people that even the smallest symptoms of kidney trouble should have serious attention.

Backache, for instance, puffiness under or specks floating before the eyes, heavy feet and dry skin, are also danger signals.

"Thousands die yearly because they neglect their kidneys," says Dr. Carey, "and I feel upon retiring that I should tell all who even suspect kidney or bladder trouble about my prescription, Marshroot, which, during my active practice, has cured thousands of all kinds of kidney ailments."

This prescription has been given to pharmacists generally throughout America and is dispensed by them under the name Dr. Carey's Marshroot, a name that every sufferer from kidney trouble should remember. People's Drug Store can supply you.
